
REVEREND MILTON NOTHDURFT

Reverend Milton Nothdurft is scheduled for our next lecture, Friday Evening, October 16th, at 7:30 o'clock. Reverend Nothdurft, of Maquoketa, Iowa, is an ordained Methodist minister, the son of a minister. He has had wide experience in religious work, especially with Youth groups. This lecture is entitled "Why the Confusion In Saucer Research."

Reverend Nothdurft holds a Bachelor of Arts degree from Cornell College (Iowa), Bachelor of Sacred Theology, Boston University School of Theology (seminary training for the ministry). Also Master of Sacred Theology, Boston University, School of Theology.

His interest in Saucers began even before the Kenneth Arnold episode. He read and subscribed to all the Science Fiction and Space magazines he could find. He numbers among his friends the most known of the contactees and researchers, although he isn't an actual contactee himself. While on a trip to the Holy Land in 1954 he met and had tea with Desmond Leslie in his apartment in London.

Reverend Nothdurft suggests that we take personal feelings out of our study of Flying Saucers and says, "Let us unite under the banner of the Prince of Peace."

This lecture will be held at Drexel Hall, Linwood and Baltimore, Kansas City. Remember the time is 7:30 in the evening. A donation of \$1.50 will be taken.

International Convention at Des Moines, Iowa

An INTERNATIONAL Convention of the Universal Fellowship Order will be held at Des Moines, Iowa, on Friday, Saturday and Sunday, October 30, 31 and November 1, at the Fellowship Tabernacle, located in the 2600 block, S.E. 14th Street & Creston. For Reservations please write to Dr. Roy Parsons, Pastor of Fellowship Tabernacle, or Dr. Wallace C. Halsey, Associate Pastor, P.O. Box 150, Des Moines, Iowa. Be sure to state the number of your party who will attend.

A banquet is being planned for this occasion. Don't miss this most wonderful opportunity to get acquainted with the Parsons and Halseys and the work which is being started there. Make plans and reservations RIGHT NOW!

Directions for finding Fellowship Tabernacle: Leaving Kansas City, take Highway 69 north to Osceola, Iowa, then just north of Osceola about 1 mile, turn west 1 mile, to the Iowa State Freeway, then north to the Airport turn off at Des Moines, turn east and go 9 miles, to Highways 69 & 65, then north about 2 miles, to the 2600 block. A sign on west side of street, "Fellowship Tabernacle" points the way into the grounds.

UFO NACHRICHTEN

WIESBADEN, GERMANY

A UFO SAULUS TURNS INTO A PAULUS

Dr. Donald Menzel, Professor at Harvard University, U.S.A., for years a strong opponent to the opinion that UFO's are from other planets, left his Light Reflex and Hallucinations Theory, to join the front ranks for a positive UFO investigation. The reason: He recently had a sighting, which was for him absolutely convincing. Study groups, observing the same sighting, stated: One of the most clearly convincing sightings of the year.

We have been informed recently that the Mitchell Sisters plan a 4-page bulletin containing information from the Space Brothers. There will be a question and answer page. For particulars write to Helen and Betty Mitchell, 132 South Clark St., Ferguson 35, Mo.

For copies of the Mitchell Sisters' lectures of last January and the convention at Buck Nelson's, write to Mrs. Luella R. Wheeler, 1117 W. Truman Road, Independence, Missouri. They are 50¢ each.

For information concerning Tape Recordings of UFO Club speeches call or write Mr. Ken Priest, 3001 Norton, Independence, Mo. His telephone number is CL 4-4178.

We wish to express our regrets over the recent resignation of Mr. Dwight Bockman as Editor of the Spaceviewer. We take this opportunity to express our appreciation for the wonderful job of editing you have done for us, Dwight.

Mrs. Julia Brogan, 3623 Windsor, Kansas City 23, Mo., has taken over the job. She has had quite a bit of training as a writer but to date has done more poetry than factual writing. She feels this will be a wonderful opportunity to learn. Welcome to our staff, Julia.

A letter from Thelma Olson calling our attention to Miss Laura Taylo's recent visit to our meeting has been received. She lives for the summer at Moline, Kansas, which is 250 miles away. She came in Sunday morning and left on the midnight train after the lecture. She is very interested in Ufology. Miss Olson also calls our attention to the group which comes from Wichita. We understand the group is brought by Dr. Schmidt. Thank you, Miss Olson, for telling us.

From Gladys Fusaro, Director of Intercontinental Aerial Research Foundation, New York, Luella Wheeler had a letter recently. Among other interesting things she said is, "I think if MORE concentration on our work in our particular fields was given instead of 'assassination' of personalities, their work and character, there would be more accomplished. It seems a shame the amount of jealousy and distrust that exists among certain ones in some of the groups. After all, we are ALL trying to work TOGETHER for a common cause, to find out the truth of the Enigma of the UFO's, and to find a way of better understanding of the way of Life, and this dissention certainly doesn't help the cause at all."

From S U F O I, Denmark, Europe, May 20, 1959, comes:

"FLYING SAUCER MAN VISITS QUEEN JULIANA"

"Haag-RB--Reuter--Queen Juliana and Prince Bernhard received Monday the 68-year-old self-appointed California expert of flying saucers in a private audience at Castle Soestdijk, near Utrecht. The visit has been criticised by the Holland Press.

"Adamski, who is in Holland to report on his alleged meeting with inhabitants of Mars, has written a book titled THE FLYING SAUCERS HAVE LANDED. The American claims also that he has met inhabitants from Venus and has traveled to the moon. The audience lasted about an hour.

"The attache to the Queen said later that the meeting was arranged so the Royal couple could meet Adamski and learn more about his point of view. Commenting on the criticism of the meeting in several of the papers the attache reminded them that it is only the Queen's private affair who she receives in an audience.

"Amsterdam's leading Catholic newspaper said it 'has nothing against Adamski's audience if he was not considered as an astronomical philosopher, who has received wisdom from the inhabitants of Mars and Venus, whom nobody else has ever seen.'"

N.Y. Times, July 29, 1959:

NEW RADAR SPOTS MAN CRAWLING TWO MILES AWAY

The army has developed a super-sensitive radar that can see and hear a soldier crawling on the ground 2 miles away, or spot a tank or jeep at ten miles. It says the gadget is so refined it can tell the difference between a man and a woman at more than 600 yards at night or in a fog.

An announcement today said the two-mile range for spotting a crawling soldier was under average conditions. Under ideal conditions in a test made in the desert, the surveillance radar spotted a soldier walking at fifteen miles. Army technicians noted that men were usually taller than women and showed pronounced differences in walk.

PONTIAC, MICHIGAN, PRESS, August 18, 1959:

Two yellow discs hovered over the horizon and streaked across the sky, leaving a flaming trail of red and pink vapor. Reports of the sighting came from all over the Pontiac area. Witnesses say they first appeared about 7:30 P.M. and continued their 'eerie performance with a purpose' for about 20 minutes. Wanda Bierl, 405 Linda Vista Drive, tells about it:

"We were sitting in the car at a drive-in waiting for the show to begin while our three children were at the playground up front. It wasn't quite dark yet and suddenly my husband told me to look at those things in the lower horizon. We saw couples in other cars watching too, and some got out to look.

"There were two yellow discs in the sky, not in the heavens, but in our atmosphere. The two objects faced each other and for about 8 minutes stood perfectly still, except that when you looked at them very closely they looked like they were drifting with the wind and moving slightly. They moved separately and of their own accord. There wasn't a cloud in the sky and I couldn't find the moon.

"The next 3 minutes one moved higher and they stood there drifting in place. All of a sudden the lower one took off in a straight upward movement and became a very thin disc with a long, yellow tail, with a bit of red in it looking like a fire streak. Then, 30 seconds later, the second one moved up and over and down in a perfect arc, leaving a yellow trail behind it. It disappeared completely while the first disc continued to go straight up, then leveled off and began flying perfectly straight about 3 minutes, trailing to the right with a stream of yellowish reddish vapor that faded to pink as it disappeared. As the first one faded the second came back into view, looking like it was coming straight at us, right under the other which reappeared. They both arched together, making a big U-turn and streaked away. The objects had very distinct lines, except when they moved in a blurred flight. They were very distinct in movements, not like something fallen to earth. There was a human intelligence about the whole thing, or superhuman."

Local observatories and police could give no explanation for last night's occurrence.--(Thanks to Ruth & Al Korinek of Detroit.

This summer your new editor was fortunate enough to have a month's vacation in the West, with the focal point the Amalgamated Flying Saucer Clubs of America, Inc., convention at the Statler-Hilton Hotel, in Los Angeles. I asked Gabriel Green personally Sunday morning how many people were there and he said the count was about 2500 for Saturday but they didn't have a total yet for Sunday. It was a very wonderful experience. But if I had any criticism at all it would be they had too many things scheduled and we had to skip about too much. All of the ballroom floor was divided into meeting rooms, and I heard some marvelous speakers. But one can't be in six places at once, so I imagine I missed some I should have heard.

Going through the desert towards San Diego from Phoenix, when we got back in the bus from a rest stop about 2 A.M. the woman next to me called my attention to an extremely bright star. By then several of the others were watching it. It kept getting bigger and bigger until it was about the size of a silver dollar. Then it seemed to flip over on its side and just faded away. We were too astonished to speak for a minute as it all happened so suddenly. The same thing happened as I was crossing Utah toward Salt Lake City. I am convinced it was a saucer but it didn't come close enough for identification.

On Saturday afternoon of the meeting someone handed a newspaper to the speaker. In 2-inch letters, visible all over the room, he held up the Los Angeles Mirror News: MYSTERY SKY OBJECT SIGHTED OVER PACIFIC. When we could rush and get papers we found a "veteran pilot for Pan American World Airways reported he and his co-pilot saw an object with a mysterious cluster of extremely bright lights flashing past his plane over the Pacific, 'faster than anything I've ever seen.' Wilson said the object seemed to be bearing down on his plane but turned abruptly and lights disappeared. He said 'it made a believer of me.'"

I clipped items from several other Los Angeles papers, all about sightings during the convention.
(Continued)

In addition to the convention, I stopped a while at San Diego to dream by the ocean I had never seen; spent a day at Disneyland; ate fish down at Fisherman's Wharf in San Francisco after riding the cable-car down. I stopped off two weeks at Flagstaff, Arizona, to a writers' workshop and was fortunate to visit Mt. Lowell Observatory. That is the one that discovered Pluto. We saw Jupiter and three of his twelve moons. I heard the wonderful organ in a concert at the Mormon Temple in Salt Lake City. Truly a memorable vacation.

SUPPORT YOUR CLUB

Attendance at all club activities is a very essential part of it. Clubs just do not survive by remote control. For a club to grow and thrive it requires the participation of its members. This is an active and highly informative club and it is our individual responsibilities to keep it that way. We are on the inside, in the know on many of the things the public should know. Being in this position, we have a responsibility to the public under universal law. These responsibilities do not necessarily come easy or cheap. Let us resolve to make a showing in our attendance, urging all of our friends to attend, and get a new period of growth started that can go a long way toward enlightening Kansas City.

If you enjoy the SPACE VIEWER we hope you will keep your membership dues up to date. They are \$2.00 a year. All donations are acceptable.

Remember the date of the next meeting, October 16, Friday evening at 7:30 at Drexel Hall. Speaker, the Reverend Milton Nothdurft of Maquoketa, Iowa, his subject, "Why the Confusion In Saucer Research". This will be the only notice sent out about this lecture, so mark it on your calendar NOW!!
